

# Nancy Larson® Science 3 Table of Contents

## A: Exploring Our Solar System

- 1 Describing what scientists do  
Identifying objects in our solar system
- 2 Describing characteristics of the Sun
- 3 Showing the Earth's movement on its axis  
Identifying the cause of day and night on Earth
- 4 Describing and showing the Earth's movement around the Sun
- 5 Identifying the causes of the Earth's seasons
- 6 Describing and showing the Moon's movement around Earth  
Describing the characteristics of the Moon
- 7 Identifying characteristics of the Moon  
Identifying the role of astronauts in outer space exploration
- 8 Identifying and describing a new and a full Moon
- 9 Identifying the phases of the Moon
- 10 Review 1: Astronomy—Sun, Earth, Moon
- 11 Assessment 1: Astronomy—Sun, Earth, Moon
- 12 Identifying and describing the planets in our solar system  
Comparing the number of moons of each planet  
Comparing the amount of time it takes each planet to rotate once
- 13 Identifying the inner and outer planets  
Describing asteroids and the asteroid belt
- 14 Describing the relative distances of the planets from the Sun
- 15 Identifying characteristics of terrestrial planets and gas giants  
Comparing terrestrial planets and gas giants
- 16 Comparing the amount of time it takes each planet to orbit the Sun
- 17 Identifying characteristics of comets
- 18 Identifying the characteristics of meteoroids, meteors, and meteorites  
Identifying the effects of meteors on Earth
- 19 Review 2: Astronomy—Planets, Asteroids, Comets, Meteors
- 20 Assessment 2: Astronomy—Planets, Asteroids, Comets, Meteors

## B: Investigating Elements and Compounds

- 21 Identifying the building blocks of the universe: elements  
Locating information on the Periodic Table of the Elements
- 22 Classifying elements on the Periodic Table of the Elements as solids, liquids, or gases  
Identifying elements our bodies require to be healthy
- 23 Identifying mineral nutrients in packaged foods and drinks
- 24 Identifying the seven most common elements in the universe  
Identifying the characteristics of a compound  
Identifying the elements that combine to make a compound
- 25 Identifying the characteristics of atoms and molecules  
Identifying the number of atoms of each element in a compound
- 26 Observing how heat creates a chemical change
- 27 Review 3: Chemistry—Elements and Compounds
- 28 Assessment 3: Chemistry—Elements and Compounds

## C: Observing Physical Changes

- 29 Observing and comparing physical and chemical changes
- 30 Describing the characteristics of matter  
Measuring the mass of solids
- 31 Measuring the volume of solids and liquids
- 32 Describing physical properties of matter  
Describing the characteristics of solids, liquids, and gases
- 33 Describing and demonstrating the movement of molecules in solids, liquids, and gases
- 34 Measuring temperature using a thermometer
- 35 Observing and measuring the changes in temperatures of hot water and ice water over time
- 36 Making a line graph to record data  
Drawing conclusions from data shown on a line graph  
Exploring the equalization of temperatures
- 37 Observing and describing a physical change: melting and freezing
- 38 Observing and describing a physical change: vaporization  
Conducting an evaporation experiment
- 39 Observing and describing a physical change: condensation
- 40 Review 4: Physics—Physical Change
- 41 Assessment 4: Physics—Physical Change

## D: Investigating Changes in Our Atmosphere

- |   |  |
|---|--|
| <ul style="list-style-type: none"><li>42 Identifying what meteorologists do<br/>Identifying the composition of the planets' atmospheres</li><li>43 Identifying the layers of the Earth's atmosphere and the characteristics of each layer</li><li>44 Describing the water cycle</li><li>45 Identifying and describing types of clouds</li><li>46 Identifying wind direction<br/>Estimating wind speed</li></ul> | <ul style="list-style-type: none"><li>47 Collecting and recording weather data</li><li>48 Describing the characteristics of tornadoes</li><li>49 Describing the characteristics of hurricanes and typhoons</li><li>50 Identifying sources of water and air pollution<br/>Identifying ways to avoid polluting the environment</li><li>51 Review 5: Meteorology—Changes in Our Atmosphere</li><li>52 Assessment 5: Meteorology—Changes in Our Atmosphere</li></ul> |
|---|--|

## E: Exploring the Earth's Structure

- |   |  |
|---|--|
| <ul style="list-style-type: none"><li>53 Identifying the characteristics of the Earth's surface</li><li>54 Identifying and describing the layers of Earth</li><li>55 Exploring the theory of plate tectonics<br/>Describing how tectonic plates move</li><li>56 Identifying tectonic plates and their movements</li><li>57 Identifying the causes and effects of earthquakes</li><li>58 Identifying the causes and effects of volcanoes</li><li>59 Identifying how igneous, sedimentary, and metamorphic rocks are formed</li><li>60 Describing and identifying igneous, sedimentary, and metamorphic rocks</li></ul> | <ul style="list-style-type: none"><li>61 Identifying the effects of weathering and erosion</li><li>62 Describing and identifying clay, silt, and sand</li><li>63 Observing and demonstrating how water moves through sand and silt</li><li>64 Identifying and describing characteristics of soil<br/>Identifying the layers of soil on the Earth's surface</li><li>65 Review 6: Geology—The Earth's Structure</li><li>66 Assessment 6: Geology—The Earth's Structure</li></ul> |
|---|--|

## F: Examining the Structure and Function of Parts of Seed Plants

- |   |   |
|---|---|
| <ul style="list-style-type: none"><li>67 Identifying what seeds need to germinate</li><li>68 Classifying plants<br/>Describing the function of parts of plants</li><li>69 Dissecting a bean seed<br/>Observing the embryo of a bean seed</li><li>70 Describing how plants make their own food by photosynthesis</li></ul> | <ul style="list-style-type: none"><li>71 Observing the germination of grass seed<br/>Analyzing data and writing conclusions for a one-variable experiment</li><li>72 Review 7: Botany—Structure and Function of Seed Plants</li><li>73 Assessment 7: Botany—Structure and Function of Seed Plants</li></ul> |
|---|---|

## G: Investigating Amphibians and Reptiles

- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>74 Identifying amphibians and reptiles<br/>Describing the dependence of animals on plants</li><li>75 Identifying amphibians and their habitats<br/>Identifying the characteristics of amphibians</li><li>76 Describing the life cycles of amphibians</li></ul> | <ul style="list-style-type: none"><li>77 Identifying the characteristics of reptiles</li><li>78 Describing the life cycles of reptiles<br/>Comparing amphibians and reptiles</li><li>79 Review 8: Zoology—Amphibians and Reptiles</li><li>80 Assessment 8: Zoology—Amphibians and Reptiles</li></ul> |
|--|--|
